

List of keywords

2. General topics

A

Agrarian History:

Agriculture in archaeology:

Agriculture

Amino acid contents

Anthropogenic soils

Arable weed flora

Archaeobotany and encouragement of monuments (Bodendenkmalpflege)

Archaeobotany

Archaeochemistry

Archaeophytes

Areas of diversity

B

Barleys

Bast

Beer

Beginnings of agriculture

Bibliography

Book reviews

Bread

C

Carbon isotope discrimination of plant seeds

Caulking

Celtic fields

Cereal domestication

Cereal processing

Cereals

Chaff

Chemical analysis

Climatic change

Climatology

Cloth-making

Coin hoard

Conference reports

Coproliths

Crop husbandry regimes

Crop plants (regional)

Crop processing

Crop rotation

Crop yields

Cultivated plants becoming feral

D

Diet

Diseases

Distilled alcohol

DNA analysis

DNA in charred crops

Domestication of founder crops

Domestication of secondary crops

Domestication
Dung
Dyeing
E
Early farming/early agriculture
Environment and ecology
Environment
Environmental archaeology
Ethnobotany
Ethnographic models
Ethnopharmacology
Experimental crop growing
Experiments
Exploitation of plants
F
Farming experiment
Favism
Flotation machine
Fodder crops, foraging
Food production
Food quality
Food
Fruit growing
Fruit processing
G
Gardens
Gathering
Grain stores
Granary
Grassland
Gut contents
H
Harvesting
Hausbau
Hay
Hemerobic
History of agriculture
History of weeds
History of wheats
Honey
Honorings
Horticulture
House building
Human diet
Hunger
Hunter - Gatherers
IJ
Identification by discriminant analysis
Identification keys:
Identification
Illustrations
Image processing

Imprints in sherds
In memoriam
Introduction of new crops
